JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject Index of Volume 474

Ac impedance
An electrochemical impedance study on the interfacial behaviour of KC_8 electrodes in $LiClO_4$ containing electrolytes 107
Adsorption
A contribution to the study of the electroreduction of 2-chloro-4,6-di(ethylamino)-1,3,5-triazine (simazine) on mercury electrodes 174
Adsorption at columnar surfaces
Steric effects on molecular adsorption at columnar surfaces. A model for the adsorption of pyridine on gold electrodes 74
Adsorption modeling
Steric effects on molecular adsorption at columnar surfaces. A model for the adsorption of pyridine on gold electrodes 74
Adsorption on platinum
Catalytic and electrocatalytic oxidation of oxalic acid in aqueous solutions of different compositions 147
Amperometric sensor
Amperometric nitrate biosensors on the basis of *Pseudomonas stutzeri* nitrate reductase 43
Anion adsorption
Catalytic and electrocatalytic oxidation of oxalic acid in aqueous solutions of different compositions 147

Bending beam method
In-situ detection of stress in oxide films during Si electrodissolution in acidic fluoride electrolytes 182
Bovine serum albumin
Redox-cycling type electrochemiluminescence in aqueous medium. A new principle for the detection of proteins labeled with a ruthenium chelate 192

Calorimetry
The complex formation of non-cyclic polyethers and crown ethers with Ag^+ in acetone and propylene carbonate studied by potentiometric and calorimetric methods 188
Carbon monoxide
Infrared spectroscopy of carbon monoxide and nitric oxide on palladium(111) in aqueous solution: unexpected adlayer structural differences between electrochemical and ultrahigh-vacuum interfaces 155
Catalytic oxidation
Catalytic and electrocatalytic oxidation of oxalic acid in aqueous solutions of different compositions 147
Clay modified electrode
Electrochemical characterization of the clay-enhanced luminol ecl reaction 82
Copper
Electrodeposition of copper from cuprous cyanide electrolyte: I. Current distribution on a stationary disk 16
Electrodeposition of copper from cuprous cyanide electrolyte: II. Current distribution on a rotating disk 31
Copper complexes
Electrodeposition of copper into functionalized polypyrrole films 113
Crown ethers
The complex formation of non-cyclic polyethers and crown ethers with Ag^+ in acetone and propylene carbonate studied by potentiometric and calorimetric methods 188
Current distribution
Electrodeposition of copper from cuprous cyanide electrolyte: I. Current distribution on a stationary disk 16
Electrodeposition of copper from cuprous cyanide electrolyte: II. Current distribution on a rotating disk 31
Cyanide
Electrodeposition of copper from cuprous cyanide electrolyte: I. Current distribution on a stationary disk 16
Electrodeposition of copper from cuprous cyanide electrolyte: II. Current distribution on a rotating disk 31
Diffusion
Effects of self-stress on the hydrogen absorption into palladium hydride electrodes of plate form under galvanostatic conditions 130
Disk electrode
Electrodeposition of copper from cuprous cyanide electrolyte: I. Current distribution on a stationary disk 16
Double layer correction
Some remarks on the double layer correction to the kinetics of ion transfer at the interface of immiscible electrolytes 89

Electrocatalysis
Electrochemical characterization and electrocatalysis of high valent manganese *meso*-tetrakis(*N*-methyl-2-pyridyl)porphyrin 52
Electrodeposition of copper into functionalized polypyrrole films 113
Electrocatalytic oxidation
Catalytic and electrocatalytic oxidation of oxalic acid in aqueous solutions of different compositions 147
Electrochemical impedance spectroscopic
Electrochemical characterization of the clay-enhanced luminol ecl reaction 82
Electrochemical intercalation
Behaviour of titanium species in molten $Li_2CO_3 + Na_2CO_3$ and $Li_2CO_3 + K_2CO_3$ in the anodic conditions used in molten carbonate fuel cells: II. Electrochemical intercalation of Li^+ in Li_2TiO_3 at 600 and 650°C 9
Electrochemical oxidation
Electrochemical characterization and electrocatalysis of high valent manganese *meso*-tetrakis(*N*-methyl-2-pyridyl)porphyrin 52
Electrochemical quartz crystal microbalance
Electrochemical quartz crystal microbalance study of electrodeposited ruthenium 167
Electrochemical supercapacitor
Electrochemical quartz crystal microbalance study of electrodeposited ruthenium 167
Electrochemiluminescence
Redox-cycling type electrochemiluminescence in aqueous medium. A new principle for the detection of proteins labeled with a ruthenium chelate 192

PII: S0022-0728(99)00375-7

Electrocrystallization parameters
A new approach to the estimation of electrocrystallization parameters 69
Electrode kinetics
A contribution to the study of the electroreduction of 2-chloro-4,6-di(ethylamino)-1,3,5-triazine (simazine) on mercury electrodes 174
Electrodeposition
Electrochemical quartz crystal microbalance study of electrodeposited ruthenium 167
Electrodeposition of copper from cuprous cyanide electrolyte: I. Current distribution on a stationary disk 16
Electrodeposition of copper from cuprous cyanide electrolyte: II. Current distribution on a rotating disk 31
Electrode reaction
Salt and isotope effects upon a multistep electrode reaction: the reduction of nitromethane on mercury 60
Electron transfer
Mass transport accompanied with electron transfer between the gold electrode modified with 11-ferrocenylundecanethiol monolayer and redox species in solution — an electrochemical quartz crystal microbalance study 94
EQCM
Electrochemical quartz crystal microbalance and in situ infrared spectroscopic studies on the redox reaction of Prussian blue 101

Mass transport accompanied with electron transfer between the gold electrode modified with 11-ferrocenylundecanethiol monolayer and redox species in solution — an electrochemical quartz crystal microbalance study 94
11-Ferrocenylundecanethiol
Mass transport accompanied with electron transfer between the gold electrode modified with 11-ferrocenylundecanethiol monolayer and redox species in solution — an electrochemical quartz crystal microbalance study 94
Fluorinating reagents
Electrochemical studies of six N–F electrophilic fluorinating reagents 1
Fuel cell
Behaviour of titanium species in molten $Li_2CO_3 + Na_2CO_3$ and $Li_2CO_3 + K_2CO_3$ in the anodic conditions used in molten carbonate fuel cells: II. Electrochemical intercalation of Li^+ in Li_2TiO_3 at 600 and 650°C 9
Functionalized polypyrrole
Electrodeposition of copper into functionalized polypyrrole films 113

Genetic algorithm
A new approach to the estimation of electrocrystallization parameters 69
Gold
Surface structural transitions induced by repetitive underpotential deposition of Ag on Au(111) 138
Gold electrode
Mass transport accompanied with electron transfer between the gold electrode modified with 11-ferrocenylundecanethiol monolayer and redox species in solution — an electrochemical quartz crystal microbalance study 94

High temperature
Behaviour of titanium species in molten $Li_2CO_3 + Na_2CO_3$ and $Li_2CO_3 + K_2CO_3$ in the anodic conditions used in molten carbonate fuel cells: II. Electrochemical intercalation of Li^+ in Li_2TiO_3 at 600 and 650°C 9

In situ FTIR
Electrochemical quartz crystal microbalance and in situ infrared spectroscopic studies on the redox reaction of Prussian blue 101
Interface
Infrared spectroscopy of carbon monoxide and nitric oxide on palladium(111) in aqueous solution: unexpected adlayer structural differences between electrochemical and ultrahigh-vacuum interfaces 155
Ion transfer
Some remarks on the double layer correction to the kinetics of ion transfer at the interface of immiscible electrolytes 89
IR spectroscopy
Infrared spectroscopy of carbon monoxide and nitric oxide on palladium(111) in aqueous solution: unexpected adlayer structural differences between electrochemical and ultrahigh-vacuum interfaces 155
Isotope effect
Salt and isotope effects upon a multistep electrode reaction: the reduction of nitromethane on mercury 60
ITIES
Some remarks on the double layer correction to the kinetics of ion transfer at the interface of immiscible electrolytes 89

KC_8 electrode
An electrochemical impedance study on the interfacial behaviour of KC_8 electrodes in $LiClO_4$ containing electrolytes 107
Kinetics
Effects of self-stress on the hydrogen absorption into palladium hydride electrodes of plate form under galvanostatic conditions 130

Numerical simulation of hydrogen (deuterium) absorption into β-phase hydride (deuteride) palladium electrodes under galvanostatic conditions 123
Labeled proteins
Redox-cycling type electrochemiluminescence in aqueous medium. A new principle for the detection of proteins labeled with a ruthenium chelate 192
Lithium-ion cell
An electrochemical impedance study on the interfacial behaviour of KC_8 electrodes in $LiClO_4$ containing electrolytes 107
Lithium titanate
Behaviour of titanium species in molten $Li_2CO_3 + Na_2CO_3$ and $Li_2CO_3 + K_2CO_3$ in the anodic conditions used in molten carbonate fuel cells: II. Electrochemical intercalation of Li^+ in Li_2TiO_3 at 600 and 650°C 9
Luminescence
Electrochemical characterization of the clay-enhanced luminol ecl reaction 82

Manganese porphyrin
Electrochemical characterization and electrocatalysis of high valent manganese *meso*-tetrakis(*N*-methyl-2-pyridyl)porphyrin 52
Mass transport
Mass transport accompanied with electron transfer between the gold electrode modified with 11-ferrocenylundecanethiol monolayer and redox species in solution — an electrochemical quartz crystal microbalance study 94
Modified electrode
Electrodeposition of copper into functionalized polypyrrole films 113
Molten carbonate
Behaviour of titanium species in molten $Li_2CO_3 + Na_2CO_3$ and $Li_2CO_3 + K_2CO_3$ in the anodic conditions used in molten carbonate fuel cells: II. Electrochemical intercalation of Li^+ in Li_2TiO_3 at 600 and 650°C 9
Nitrate
Amperometric nitrate biosensors on the basis of *Pseudomonas stutzeri* nitrate reductase 43

Nitrate reductase
Amperometric nitrate biosensors on the basis of *Pseudomonas stutzeri* nitrate reductase 43
Nitric oxide
Infrared spectroscopy of carbon monoxide and nitric oxide on palladium(111) in aqueous solution: unexpected adlayer structural differences between electrochemical and ultrahigh-vacuum interfaces 155
Nitromethane
Salt and isotope effects upon a multistep electrode reaction: the reduction of nitromethane on mercury 60

Olefin oxidation
Electrochemical characterization and electrocatalysis of high valent manganese *meso*-tetrakis(*N*-methyl-2-pyridyl)porphyrin 52
Oxalic acid
Catalytic and electrocatalytic oxidation of oxalic acid in aqueous solutions of different compositions 147

Palladium(111) electrode
Infrared spectroscopy of carbon monoxide and nitric oxide on palladium(111) in aqueous solution: unexpected adlayer structural differences between electrochemical and ultrahigh-vacuum interfaces 155
Parameters estimation
A new approach to the estimation of electrocrystallization parameters 69
Passivation
An electrochemical impedance study on the interfacial behaviour of KC_8 electrodes in $LiClO_4$ containing electrolytes 107
Pd | D electrode
Numerical simulation of hydrogen (deuterium) absorption into β-phase hydride (deuteride) palladium electrodes under galvanostatic conditions 123
Pd | H electrode
Effects of self-stress on the hydrogen absorption into palladium hydride electrodes of plate form under galvanostatic conditions 130
Numerical simulation of hydrogen (deuterium) absorption into β-phase hydride (deuteride) palladium electrodes under galvanostatic conditions 123
Platinum
Electrochemical studies of six N–F electrophilic fluorinating reagents 1
Platinum catalyst
Catalytic and electrocatalytic oxidation of oxalic acid in aqueous solutions of different compositions 147
Polyethers
The complex formation of non-cyclic polyethers and crown ethers with Ag^+ in acetone and propylene carbonate studied by potentiometric and calorimetric methods 188
Potentiometry
The complex formation of non-cyclic polyethers and crown ethers with Ag^+ in acetone and propylene carbonate studied by potentiometric and calorimetric methods 188
Prussian blue
Electrochemical quartz crystal microbalance and in situ infrared spectroscopic studies on the redox reaction of Prussian blue 101
Pseudomonas stutzeri
Amperometric nitrate biosensors on the basis of *Pseudomonas stutzeri* nitrate reductase 43
Pyridine adsorption on gold
Steric effects on molecular adsorption at columnar surfaces. A model for the adsorption of pyridine on gold electrodes 74

Redox-cycling
Redox-cycling type electrochemiluminescence in aqueous medium. A new principle for the detection of proteins labeled with a ruthenium chelate 192
Redox mediator
Amperometric nitrate biosensors on the basis of *Pseudomonas stutzeri* nitrate reductase 43
Reduction
Electrochemical studies of six N–F electrophilic fluorinating reagents 1
Salt and isotope effects upon a multistep electrode reaction: the reduction of nitromethane on mercury 60
Reduction mechanisms
A contribution to the study of the electroreduction of 2-chloro-4,6-di(ethylamino)-1,3,5-triazine (simazine) on mercury electrodes 174
Rotating disk electrode
Electrodeposition of copper from cuprous cyanide electrolyte: II. Current distribution on a rotating disk 31
$Ru(bpy)_3^{2+}$
Redox-cycling type electrochemiluminescence in aqueous medium. A new principle for the detection of proteins labeled with a ruthenium chelate 192
Ruthenium
Electrochemical quartz crystal microbalance study of electrodeposited ruthenium 167
Ruthenium chelate
Redox-cycling type electrochemiluminescence in aqueous medium. A new principle for the detection of proteins labeled with a ruthenium chelate 192

Salt effect
Salt and isotope effects upon a multistep electrode reaction: the reduction of nitromethane on mercury 60
Silicon anodic dissolution
In-situ detection of stress in oxide films during Si electrodissolution in acidic fluoride electrolytes 182
Silicon oxide etching
In-situ detection of stress in oxide films during Si electrodissolution in acidic fluoride electrolytes 182
Silver
Surface structural transitions induced by repetitive underpotential deposition of Ag on Au(111) 138
The complex formation of non-cyclic polyethers and crown ethers with Ag^+ in acetone and propylene carbonate studied by potentiometric and calorimetric methods 188
Simazine
A contribution to the study of the electroreduction of 2-chloro-4,6-di(ethylamino)-1,3,5-triazine (simazine) on mercury electrodes 174
STM
Surface structural transitions induced by repetitive underpotential deposition of Ag on Au(111) 138
Stress
Effects of self-stress on the hydrogen absorption into palladium hydride electrodes of plate form under galvanostatic conditions 130
Surface alloys
Surface structural transitions induced by repetitive underpotential deposition of Ag on Au(111) 138
Surface morphology
Surface structural transitions induced by repetitive underpotential deposition of Ag on Au(111) 138

Titanium
Behaviour of titanium species in molten $Li_2CO_3 + Na_2CO_3$ and $Li_2CO_3 + K_2CO_3$ in the anodic conditions used in molten

carbonate fuel cells: II. Electrochemical intercalation of Li^+ in Li_2TiO_3 at 600 and 650°C 9
Triazine herbicides
A contribution to the study of the electroreduction of 2-chloro-4,6-di(ethylamino)-1,3,5-triazine (simazine) on mercury electrodes 174

Upd
Surface structural transitions induced by repetitive underpotential deposition of Ag on Au(111) 138

Voltammetry
A contribution to the study of the electroreduction of 2-chloro-4,6-di(ethylamino)-1,3,5-triazine (simazine) on mercury electrodes 174
Surface structural transitions induced by repetitive underpotential deposition of Ag on Au(111) 138

Zinc
A new approach to the estimation of electrocrystallization parameters 69
